## POSITION: SENIOR RESEARCH ASSOCIATE, PHARMACOLOGY

---

**Level:** Exempt

**Task:** Perform pharmacology/pharmacokinetic studies in animals to support contracted research efforts in the fields of oncology, CNS, and autoimmune diseases.

### Essential functions:

Plan and execute in vivo studies, including dosing by various routes (IV, PO, SC, IP and IM), blood and tissue collection at designated time points, euthanasia, necropsy, gross autopsy examination, and animal care by following SOPs and study protocols.

Accurate data entry and documentation of study details and progress. Maintain current laboratory notebooks and computer data files.

Pack and ship study samples.

Participate in project meetings and maintain close communication with peers and colleagues.

Maintain a functional working knowledge of the applicable scientific arena.

Guide and train less experienced personnel.

Perform other related duties critical to support company goals.

### Qualification:

B.S. or M.S. degree in biology or related biological disciplines, with 3+ years of experience performing and handling animal studies. Proficient hands-on techniques and experience with in vivo procedures is required. Must be detail oriented, have the ability to work both independently and as a team player. Perform daily work with excellent work ethic, multi-tasking capability and thrive to meet with tight timelines. Must be proficient in MS office. We are looking for a person willing to grow and succeed with our company.
